

HTML Mini Web Page - Project Rubric

Key Concept	Extensive Evidence	Convincing Evidence	Limited Evidence	No Evidence
Using Computer Languages	Website uses 8 different HTML tags, heading, paragraph tags, image tags, list tags and other tags. There are minimal syntax errors and the page renders correctly. All text in the page is contained inside elements.	Website uses HTML heading tags, paragraph tags, image tags. The page renders correctly, but there are some syntax errors. Text is generally contained inside elements.	Website uses some HTML heading tags, paragraph tags, image tags. Most of the page renders correctly, but there are significant syntax errors and some text may not be contained in elements.	The website does not use HTML heading tags, paragraph tags, image tags. Syntax errors prevent the page from being rendered correctly. Some text is outside elements, and tags such as <html>, <head> and <body> may be missing.
Creating a Digital Artifact	Website uses HTML tags and 8 different CSS properties to format the page, in a logical way that is consistent with the plan in the project guide and helps the user understand the page.	The website uses HTML tags and CSS to format the page in a way that is generally consistent with the plan in the project guide.	The website uses HTML tags & CSS to format the page, but it may be different from the plan in the project guide.	Website does not use HTML tags or CSS to format text.
Debugging and Clean Code	HTML & CSS Code is consistently well formatted, in separate files, with nested tags aligned vertically to make them easier to read.	HTML & CSS code is generally well formatted using whitespace, in separate files, though there may be some parts that are difficult to read.	HTML & CSS code is sometimes formatted to be readable, but does not consistently use white space to organize tags.	HTML & CSS code is not formatted in a readable way, makes little use of white space.
Program Development	Gave thoughtful feedback to peers and responded to peer feedback by making appropriate changes to the web page. Reflection complete.	Gave and responded to peer feedback.	Gave some feedback to peers.	Did not give feedback to peers.
